WORK EXPERIENCE

NGSoft

Jan. 2024 – Present

Front-end developer

Petah Tikva, IL

- Developed high-performance iOS/Android apps using React Native for major clients like Clalit and Phoenix, ensuring platform consistency in an Agile environment.
- Revamped an outdated project by upgrading dependencies, improving code structure, and adding missing TypeScript declarations, enhancing maintainability.
- Created a complex interactive graph with Skia, delivering precise behavior beyond client expectations.
- Built a robust GitLab CI/CD pipeline and championed initiatives for enhanced testing, actively working on continuous improvements.

FeelThere Live

Nov. 2022 – Jan 2024

FullStack developer

Ashdod, IL

- Actively contributed to the architecture, development, and optimization of the tech stack.
- Participated in discussions about product direction, feature design, and business strategy.
- Enhanced React Native camera capabilities by identifying and resolving critical gaps. Learned Objective-C and Java to implement essential features like mute, photo capture, and zoom, improving the app's streaming performance.
- Integrated third-party APIs (Google, Facebook, LinkedIn, Twitch) to streamline authentication and enable multi-platform streaming, allowing users to manage multiple accounts and stream live video effortlessly while ensuring platform compliance.

EDUCATION

Coding Academy

May. 2022 – Aug 2022

Intensive coding bootcamp (640 hours).

- Mastered essential full-stack development skills, specializing in Vue and Node, gained proficiency in multiple JavaScript frameworks, RESTful server design, and responsive web design.
- Engaged in pair programming and code reviews, adhering to industry standards to simulate real-world development environments.
- [Orello: A Trello Clone](#) Built using Vue, Node, and MongoDB, full-stack development skills.

SKILLS

Languages: Good: TypeScript, JavaScript, HTML, CSS, MongoDB | Decent: SQL, Python | Basic: Java, Objective-C, Zig

Frameworks/Libraries: Good: React, React Native, Solid, Express, Next | Decent: Vue, tRPC, Three.js | Basic: Angular

Developer Tools: Good: Git (Github), VS Code, Jira, Wrike | Decent: Vitest, Docker, Vercel, PlanetScale | Basic: Azure

PREVIOUS WORK EXPERIENCE

Flex, Systems Integrator

Jan. 2021 – May 2022

- Integrated a wafer quality control tool for the largest companies in the semiconductor industry.
- Led a small team to ensure high-quality product delivery on schedule.

Meteor Aerospace, UAV Technician

Apr. 2018 – Sep. 2019

- Led a team in building, testing, and delivering UAVs.
- Collaborated with suppliers to ensure high quality while minimizing resource use.

Military Service, UAV Technician

Jan. 2015 – Jan. 2018

- Led and collaborated with a team in a high-pressure military setting, overseeing workflow.
